BLANC

Technical profile
06/2016

PHYSICAL AND CHEMICAL PROPERTIES:

- > Opalescent liquid, white in color, with characteristic scent.
- > Density: 1.00 ± 0.02 g/ml
- > pH at 10 % : 3.75 ± 0.75

PRODUCT FEATURES:

- > Highly performing softener for all kind of fabrics and textile fibers. Keeps textiles touchably soft and delivers a fresh smell.
- > Provides great humectation, makes spinning and subsequent drying of clothes easy.
- > Gives treated garments a pleasant feeling of freshness and a long-lasting softness when dry.
- > Reduces static cling on all kind of natural or synthetic fibers, making ironing and calendaring process easier.
- > This liquid product can be dispensed automatically.

USAGE:

It is applied in the last rinsing in the washer extractor or in the last module of the batch washer.

Dosing: 2-6 g/kg of dry laundry depending on the kind of textiles (flat, shaped, plush).

SAFETY ADVICE:

See safety data sheet.

Do not mix pure chemical products.

Highly performing softener, for all kind of fabrics and textile fibers.
